Dear Residents and Property Owners of the Proposed
Town of Parma Water Improvement Benefit Area #1,

Re: Well Water Sampling and Testing

The Town of Parma anticipates applying to New York State Environmental Facilities Corporation (NYSEFC) for Water Infrastructure Improvement Act (WIIA) funding for the Proposed Water Improvement Benefit Area #1. In order to submit a more competitive funding application, the project will need to provide documentation of a health and sanitary issue within the project area.

The easiest way to provide this documentation will be to collect well water samples from within the proposed district. These samples will be collected by the Town Engineer (MRB Group) and tested by a certified Laboratory (ALS Environmental) and tested for coliform contamination. Following the collection of the samples, a letter outlining all health and sanitary issues within the project area discovered by the testing will be generated and submitted.

The hope is to collect approximately twenty (20) well samples throughout the project area and have them tested no later than May 3, 2024.

The collection and testing of these samples will be done at no cost to the property owner.

If you would like to volunteer to have your well water sampled and tested or if you have any questions or concerns, please contact:

Emilio Moran of MRB Group at Emilio.Moran@mrbgroup.com

Sincerely,

James Roose
Supervisor
